Wedding Planning Auditing

No one wants to have their wedding day finally arrive only to realize there is a laundry list of things they forgot and their day ends up being anything but smooth sailing! This can lead not only to undue stress but can be incredibly embarrassing for the couple and potentially cost them a lot of money!

Planning guides and checklists are all over Google, Amazon and Pinterest but wedding planning isn't "one size fits all". These guides are extremely generic and have no idea about the specifics of *your* day or many of the finer details that often get forgotten!

Let us help you make sure you have all the bases covered and every detail of your day meticulously prepared and planned out!

Ideal for the couple that has all of their vendors and has help with making it all work on their day but needs professional experience to make sure no stone is left unturned!
